# About Global Health Hub the Netherlands

The Dutch Global Health Hub was established as a result of the Dutch Global Health Strategy. The Hub unites relevant actors and sectors, like knowledge institutes, platforms, academics, young people, NGOs, top sectors, and thinktanks, in all different aspects of global health. The primary goal of the Hub is to create a platform where different actors can exchange knowledge inspire and strengthen each other. This network allows (global) health actors in the Netherlands to gather forces to further shape the global health challenges the strategy addresses. Therefore, it is essential that the Global Health Hub is tailored to the priorities identified in the Global Health Strategy.

## **Is the Global Health Hub the Netherlands intended for you?**

The Dutch Global Health Hub leads the way towards a global health system by bringing together parties from different sectors that are active in the field of global health.

The partners of the Dutch Global Health Hub will join forces to contribute to:

- More knowledge exchange and intersectoral partnerships
- Streamlining and coordinating actions
- Encouraging innovation
- International and interministerial policy coherence
- Pioneering advocacy by various parties in the Hub

Do you have a link with The Netherlands and Global Health and are you interested in joining the Hub? You can reach out to: [globalhealth@minvws.nl](mailto:globalhealth@minvws.nl)

## **What are the focus issues of Global Health Hub the Netherlands?**

The Hub's areas of focus are the priorities as identified in the Global Health Strategy. To address each of these areas effectively, we have established three Communities of Practice, each dedicated to a specific priority as formulated in the Global Health Strategy.

- Strengthening the global health architecture and national health systems
- Improving international pandemic preparedness and minimising cross-border health threats
- Addressing the impact of climate change on public health, and vice versa.

### **1. Strengthening the global health architecture and national health systems**

Focus areas: international coherence and multilateral cooperation; improved access to primary healthcare and sexual and reproductive health and rights (SRHR).

### **2. Improving international pandemic preparedness and minimizing cross-border health threats**

Focus areas: global access to medicines and health products; strengthened international action on antimicrobial resistance (AMR) and zoonotic diseases policy (diseases that can be transmitted between animals and people).

### **3. Addressing the impact of climate change on public health, and vice versa**

Focus areas: making healthcare more sustainable and climate-resilient; international action on climate, water and food.

### **Partners**

On 28th of September 2023 the first partners of the Global Health Hub committed to active contribution by signing the Global Health Pact. You can find our partners by scanning the QR code.
